

Windows 10 does not have some programs that come with Windows 7

- Windows 7 comes with Games, Windows DVD Maker, and may come with Windows Live Essentials, like Movie Maker, Photo Gallery, etc.
 - To use games on Windows 10, you have to download apps that are similar. Here is a sample for [Solitaire](#).
 - [Windows Essentials download](#)
 - You can't download Windows DVD Maker. But, you can download a [DVD Styler program](#), and a [DVD Player program](#) which is VLC media player.
- Note – Windows 10 has a Media Player App, but sometimes it doesn't work, so you may want to use the VLC media player.
